First Office Action on the Merits

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

The specification to which the oath or declaration is directed has not been adequately identified. See MPEP § 602.

Note: The oath identifies prior provisional application as 60/346,125, filed May 30, 2000. However, (a) the provisional application identified by the present specification differs from that identified by the oath; (b) the disclosure of said provisional application differs from the present specification and (c) the filing date of said provisional application is October 19, 2001 and not May 30, 2000 as identified by the oath.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1616

3. Claims 1, 2, 11-15, 29, 30, 32 and 33 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-27 of U.S. Patent No. 6,613,801. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both compounds as defined by the instant claims wherein Aryl₂ is substituted with the group of formula -Y-C₁₋₆-alkyl-NR₇R₈ (see for example claim 4 of the cited patent). The instant claims, unlike those of the cited patent, are drawn to a broader genus of compounds. However, it would have been obvious to the skilled artisan in the art to select any of the species of the genus recited by the instant claims, including those of the cited patent, with the reasonable expectation that the compounds would have the same properties as disclosed for the genus of the present invention as a whole.

Claim Rejections - 35 USC § 112

4. Claims 1, 2, 11-15, 29, 30, 32 and 33 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The instant claims recite the limitation "wherein at least one of Aryl₁ and Aryl₂ is substituted with a lipophilic group of the formula -Y-C₁₋₆-alkyl-NR₇R₈". However, the present specification lacks description of compounds wherein Aryl₁ is substituted with -

Art Unit: 1616

Y-C₁₋₆-alkyl-NR₇R₈ and, thus, does not convey to the skilled artisan that applicant, at the time the application was filed, had possession of the claimed invention.
